This is a standard windows screen and you might have to search for your voice packet file.

Double click on the voice packet file and you should get the following:

Load Fixed Voice Data	c
Write Fixed Voice Data	
C:\Users\Dean\Desktop\CS800D WEBSITE UPDATE PROCEDURE\VoicePacket2015-03-23	
OK Cancel	
Click [OK] to write resource to radio.	

Press the OK key and you should get the following:

Load Fixed	Voice Data
W	rite Fixed Voice Data

Press the OK button and you will now get the following:

Load Fixed Voice Data	
Write Fixed Voice Data Isers\Dean\Desktop\CS800D WEBSITE UPDATE PROCEDURE\VoicePacket2015-03-23.fv	
OK Cancel	
Click [OK] to write resource to radio.	

Press the red button with the "X" to exit from this program. If you press the "OK" button like you would expect, the program will load the speech file again. This is not a problem but is a nuisance.

The radio will reset itself and now you are ready to use the radio. If you keep the programming cable plugged in, the radio will not annunciate the channel number until you remove the cable.
